

**X-Ray Fluorescence XSS®-F
for metal sorting.**

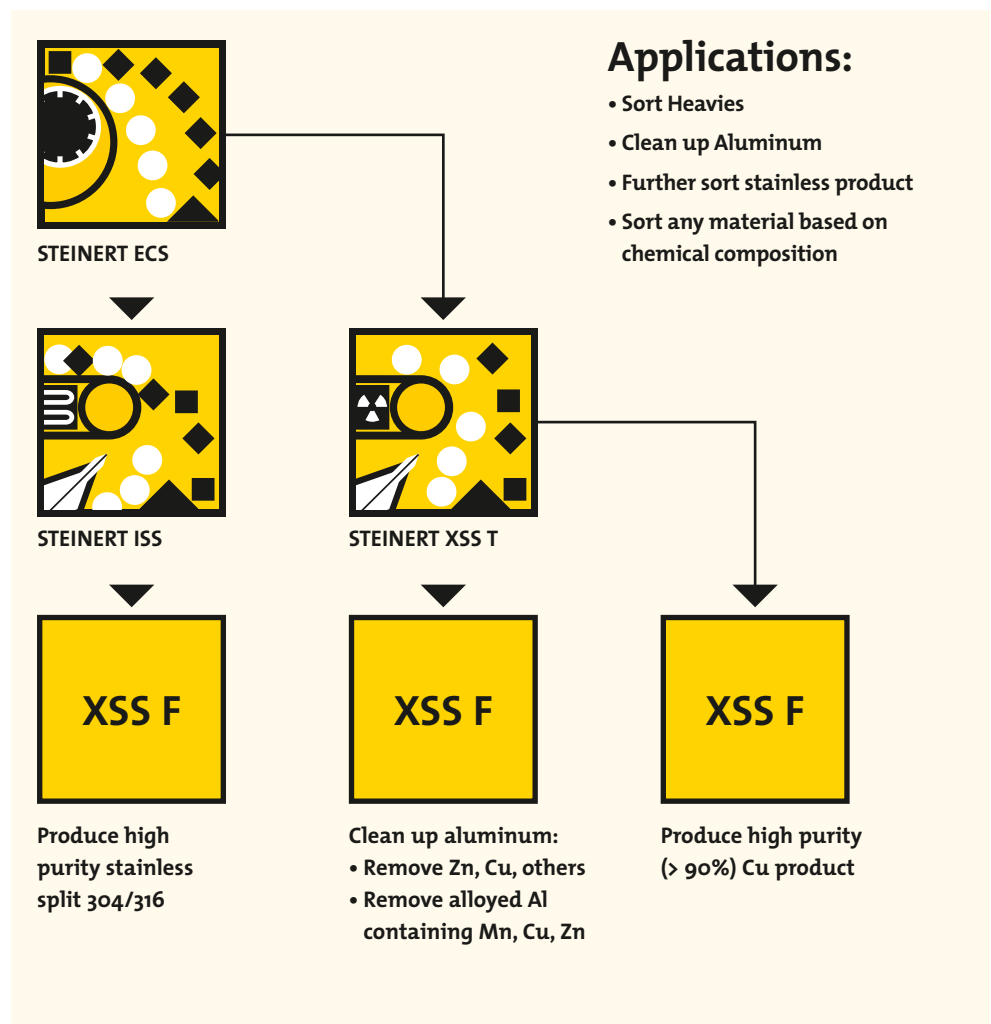

Take the next Level!

Take Metal Sorting to the Next Level with XRF technology

Magnetic drum, Eddy Current, Induction Sorting System and dual energy X-Ray Sorting are technologies that have been accepted by the market for years and years. But still, the needs remain to increase the level of sorting scrap even further. INNOV-X and STEINERT have now joined forces to bring automated X-Ray Fluorescence to the market. Innov-X's proven and unique XRF technology combined with Steinert's reliable and

tough system design will result in a sorting system that sorts based on elemental composition of scrap, allowing the recycling market to truly take metal sorting to the Next Level.
